Water Quantity Test Release Form

The water quantity test is to determine if the well can provide a sufficient amount of water. The well quantity test is a 4 hour test. The well will be run for 4 hours delivering a rate of 5 gallons per minute which amounts to 1200 gallons of water. This is an accepted criteria for a good well. WAVE Inspection requires the owner's permission since the well can run dry.

Property Address: _____

Water Quantity Test Date: _____

I authorize WAVE Inspection Services to conduct a water quantity test at the above named property address. I acknowledge that the test duration is 4 hours and release WAVE Inspection Services and their inspectors from any and all liability including but not limited to; equipment failure and well running dry.
